

Interdisciplinary Graduate Program in Genetics

Current Topics in Genetics Seminar Series

Monday, March 31st at 4:00pm - 2117 MERF

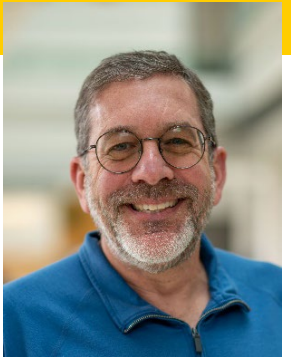

Pejman Mohammadi, PhD

Associate Professor of Pediatrics – Division of Immunology
University of Washington, Seattle

“Seminar Title TBD”

Hosted by the Genetics Graduate Students

Monday, April 7th at 4:00pm - 2117 MERF

Andrew Lieberman, PhD

Professor of Pathology, Director of Neuropathology
University of Michigan

“Spinal and bulbar muscular atrophy: more than just a motor neuron disease”

Hosted by Mark Schultz, PhD

Monday, April 14th at 4:00pm - 2117 MERF

Carsten G. Bönnemann, MD

Senior Investigator – Neuromuscular and Neurogenetic Disorders of Childhood
National Institute of Health

“Seminar Title TBD”

Hosted by the Genetics Graduate Students

Monday, April 21st at 4:00pm - 2117 MERF

Anjana Rao, PhD

Professor
La Jolla Institute for Immunology

“The TET-DNMT-ASXL1-OGT axis: regulation of DNA and histone methylation, clonal haematopoiesis, and cancer”

Hosted by Markus Kuehn, PhD

Monday, April 28th at 4:00pm - 101 BBE

Shelley Lumba, PhD

Assistant Professor of Cell & Systems Biology
University of Toronto

“One signal, two kingdoms: How strigolactones are perceived by plants and fungi”

Hosted by Bin He, PhD

Monday, May 5th at 4:00pm - 101 BBE

Karla Kaun, PhD

Associate Professor of Neuroscience
Brown University

“Molecular Changes Underlying Alcohol Reward”

Hosted by Seth Tomchik, PhD
