

# Interdisciplinary Graduate Program in Genetics

## Current Topics in Genetics Seminar Series

Monday, March 23<sup>rd</sup> at 4:00pm - 2117 MERF

### Andrew Lieberman, PhD

Gerald Abrams Collegiate Professor of Pathology, Director of Neuropathology  
University of Michigan

**“Deconstructing polyglutamine-mediated neuromuscular degeneration”**

Hosted by Mark Schultz, PhD

Monday, March 30<sup>th</sup> at 4:00pm - 101 Biology Building East

### Keith A. Maggert, PhD

Associate Professor of Molecular and Cellular Biology  
University of Arizona

**“Ribosomal DNA: a model for genome instability in evolution and cancer”**

Hosted by Lori Wallrath, PhD

Monday, April 6<sup>th</sup> at 4:00pm - 2117 MERF

### Ariel Bazzini, PhD

Associate Investigator  
Stowers Institute for Medical Research

**“Temporal and spatial post-transcriptional gene regulation during embryogenesis and viral infection”**

Hosted by the Ryan Boudreau, PhD

Monday, April 13<sup>th</sup> at 4:00pm - 2117 MERF

### James F. Martin, MD, PhD

Vice Chair of Integrative Physiology  
Baylor College of Medicine

**“Hippo Signaling in Heart Regeneration”**

Hosted by the Genetics Graduate Students

Monday, April 20<sup>th</sup> at 4:00pm - 2117 MERF

### Sarven Sabuncuyan, PhD

Associate Professor of Pediatrics  
Johns Hopkins School of Medicine

**“Extracellular Vesicle mRNAs in Psychiatric Disorders: Passive Biomarkers or Active Biological Signals”**

Hosted by the Ginny Willour, PhD

Monday, April 27<sup>th</sup> at 4:00pm - BSB Watzke Aud.

### Emily Bates, PhD

Associate Professor of Pediatrics - Developmental Biology  
University of Colorado School of Medicine

**“Electrical control of limb and craniofacial development”**

Hosted by Martine Dunnwald, PhD
